Bicycle Parking guidance

Good bike parking helps encourage more people to cycle. It is valued by employees and customers.

What is good bike parking?..

- Near the entrance to venue
- Easy to find and safe to access (eg: minimal risk of collisions, speed of traffic is low)
- Undercover and has lighting at night
- Supports the bike frame (not the front wheel) with two points of contact.

Local examples of good bike parking…

Collingwood Street, Nelson

Nelson Airport

Bicycle Nelson Bays can provide advice on how to provide good bike parking at your location.
